park assist with trained parking. Intelligent park assist helps the driver to parallel-park or bay-park the vehicle, and also to exit from such parking spaces. The system controls the steering, braking and direction of travel (forwards or backwards). It also detects objects and pedestrians and avoids collisions with them. Trained parking is used for the automatic completion of a parking manoeuvre in a parking spot that is in a familiar environment, eg at home. Users perform the parking manoeuvre themselves the first time, while the system stores the entire route, surroundings and position of the parking place in its memory so that, the next time, it can guide the car to the parking spot entirely automatically. On completing the teaching process, the user can then control this function via a mobile phone app. The car automatically controls the steering, braking and direction of travel (forwards or backwards), while continuously monitoring the surrounding area, detecting objects and pedestrians, and preventing collisions with them. The condition of this car is pristine as you would expect for a car registered from new by us and used by ourselves. There are no obvious visual marks on the exterior panels. There are no obvious visual marks on the 21 diamond finish alloy wheels. There is no wear on the leather upholstery, or trim panels. SKODA's 3-Year/60,000 mile warranty applies subject to continued manufacturer recommended routine servicing

**Acceleration 0-100 km/h:** 6.4s

**Engine Power BHP:** 295BHP

## Vehicle Features
