FOR SALE

1960 Ford Thames 300E Van

A stunning example of a very rare van that is in superb condition throughout!

The bodywork is absolutely fantastic with only very minor age related blemishes to note. The paintwork is gorgeous and has a deep lustrous shine. The panel gaps are even, the lines are level and all doors close perfectly.

The wheels and hubcaps are immaculate on this van and the underside is excellent. This is a very very well restored van that's a testament to its previous keeper. Believed to be a florists vehicle originally it hasn't suffered a hard life.

Inside the interior is fantastic, the retrimmed seats are immaculate and the rear of the van is like new.

On the road the Thames is a delight to drive with a very good engine and quiet gearbox. The brakes are firm and effective and all electrics work precisely as they should.

Overall we're confident this very rare van is the best example currently on the market!
