The 2017 Mini Countryman 1.5 Cooper Auto is a stylish and practical compact SUV that combines the classic Mini design elements with modern-day versatility. With its unique character, premium features, and improved dimensions compared to earlier models, it offers a balance of performance, space, and efficiency, making it an attractive option for urban driving.

Engine and Performance At the heart of the 2017 Mini Countryman 1.5 Cooper Auto is a 1.5-liter, 3-cylinder turbocharged petrol engine, part of BMW's TwinPower Turbo range. Despite its small size, the engine is quite potent, producing 134 horsepower (hp) at 4,400 rpm and 220 Nm of torque available from just 1,250 rpm. The turbocharged engine ensures responsive acceleration and smooth performance in both city and highway driving. Paired with a 6-speed automatic transmission, the vehicle offers effortless shifting and a comfortable ride. In terms of performance, the Mini Countryman can accelerate from 0 to 100 km/h (0-62 mph) in 9.6 seconds, which is decent for a small SUV. The top speed is around 200 km/h (124 mph). Despite its lively performance, the 1.5-liter engine is efficient, with a combined fuel economy of 6.0-6.3 L/100 km (approximately 37.7-39.2 mpg), depending on driving conditions and load. The low fuel consumption, paired with CO2 emissions of around 136-144 g/km, makes it a relatively eco-friendly choice for a car in its class.

Design and Dimensions The Mini Countryman has always stood out for its retro-inspired design, and the 2017 model is no different. However, this version is slightly larger than its predecessors, offering more space for
