The BMW M4 is effectively an M3 Coupe by another name. It's a fast, engaging and hugely desirable sports car, and it even offers a dose of practicality for those who occasionally need to carry luggage or rear-seat passengers. For many purists, the M4's turbocharged engine can't match the last car's naturally aspirated V8 for drama and character. Yet, look past the artificial soundtrack and you'll discover a truly great set-up. It delivers the sort of pace that will have supercar owners looking nervously in their rear-view mirror, yet is far more efficient than the unit it replaces.
