2007 Renault Megane 1.5 DCI
116,000 miles

4 new tyres, 2 new wheel bearings and a full service last year for MOT and hasn't covered a lot of miles since.

When braking the car is making a noise I've been advised it may be a seized caliper, should be a cheap enough fix for someone that's handy around cars and it doesn't effect the driving of the car.

Few age related marks on the body work as to be expect with the year of the car and a bit of a tear on drivers seat but apart from that clean car inside

Be a good enough work horse for someone.

Car is sold as seen.

Text or WhatsApp as I can't answer calls at work.
